

VIRKPLAN PROJECTS

Virkplan Projects helps companies plan, manage, and execute thousands of tasks — more simply, faster, and with full visibility.

-  Reduce manual planning work
-  Gain control over complex and geographically distributed tasks
-  Ensure consistent processes across the organization

BUSINESS INTELLIGENCE

Get a single, consolidated decision-making foundation with full visibility across finance, projects, sales, and customers. A turnkey standard concept that can be tailored to your business.

-  Eliminate manual data work. Data is automatically consolidated across systems.
-  Gain full visibility across finance, projects, and sales. One unified overview.
-  Early identification of deviations and risks. See problems before they grow.

ONE PLATFORM – ONE OVERVIEW – BETTER DECISIONS

When Business Intelligence and Projects drive real progress

With Virkplan, you get:

- Planning of activities, milestones, and resources
- Live visibility into progress and financials
- Contribution margin and performance per project
- Automated data collection across systems
- One single source of truth for management and project owners

What does it mean in practice?

When projects and data are connected:

- ✓ you spot deviations early
- ✓ you can adjust resources in time
- ✓ management gets one consolidated overview
- ✓ you avoid spreadsheets and manual reports
- ✓ decisions are made based on facts – not gut feelings
